Urine Pregnancy Screen	\$15
Urine Protein/Creatinine Ratio	\$15
Evaluates and monitors kidney function	
Varicella Zoster Titer, IgG	\$20
Evaluates immunity to Chickenpox	
Vitamin B12 & Folate	\$45
Evaluation of anemia or deficiency	
Vitamin D	\$44
Wellness Profile	\$20
Glucose, sodium, potassium, chloride, CO2, creatinine, bun, calcium, total protein, total bilirubin, ALP, AST, ALT	

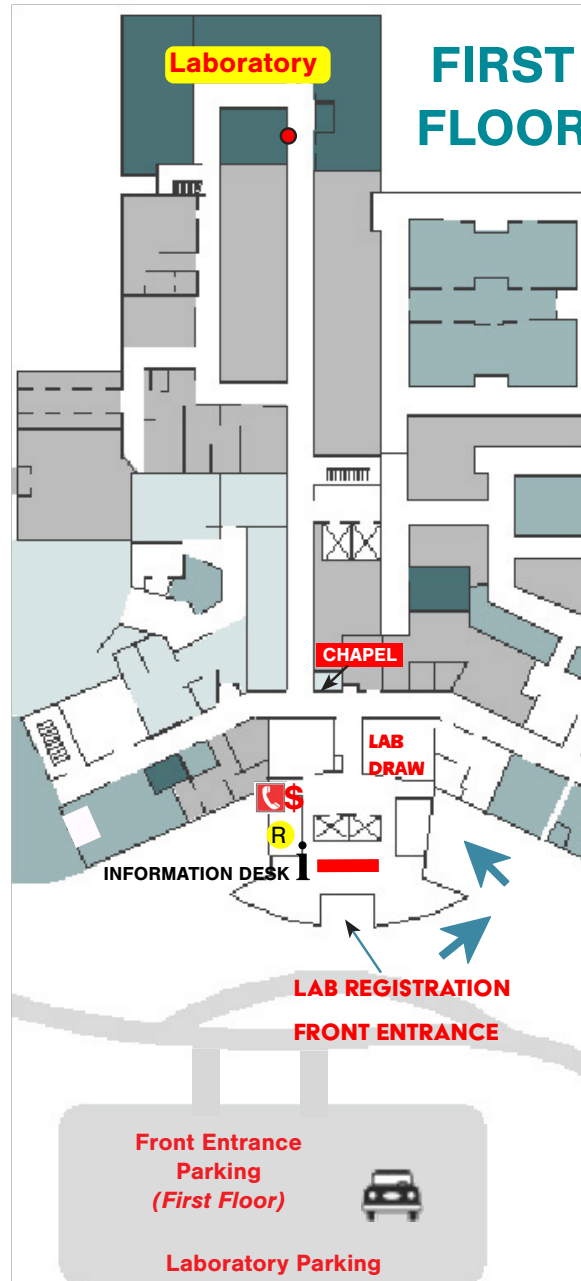

What is Direct Access Testing?

Direct Access Testing is a laboratory service that allows you to order tests based on your health concerns. It is convenient, affordable and fits into your busy lifestyle.

Medicare patients may find this service beneficial, since many annual screening tests are not covered or may not be paid because of frequency limits.

LabDirect is licensed and accredited by federal and regulatory agencies, ensuring accurate, precise results. Test results are mailed directly to you. However, if you are not feeling well, Twin County Regional Healthcare and LabDirect recommends that you see your physician.

LAB LOCATED ON FIRST FLOOR

TWIN COUNTY Regional Hospital

How does LabDirect work?

- You order lab tests based on your health concerns
- No doctor's order or appointment is necessary
- Payment is required at time of service
- There are no bills or insurance claims
- The Lab at Twin County Regional Healthcare follows all HIPAA guidelines regarding patient confidentiality

Important

Test procedures are a screening tool. They are not designed to diagnose or predict illness. It is the patient's responsibility to initiate medical follow-up to confirm test results.

You are responsible for providing results to your physician

Results are mailed within 3 working days. Results should be received within 5 working days. Please allow 5 working days to receive the results.

Menu of LabDirect Tests

Venipuncture Fee.....\$3.00

Activated Partial Thromboplastin Time (APTT) \$15	
Used to investigate unexplained bleeding or clotting	
Allergen Profile - Basic Food \$150	
Beef, Chocolate, Corn, Whole Egg, Fish/Shellfish Mix, Milk-Cow, Peanut, Pork, Soybean, Wheat	
Arthritis Panel \$20	
RA screen, uric acid	
Amylase \$15	
Evaluation of Pancreatitis	
Antinuclear Antibodies (ANA) with Reflex to Confirmatory Testing \$50	
Evaluation of autoimmune disorders	
Beta HCG (Quantitative) \$25	
Blood pregnancy test	
Blood Type \$15	
ABO and Rh	
C-Reactive Protein \$15	
Evaluation of inflammatory diseases and infections	
CBC - Complete Blood Count \$15	
WBC, RBC, hemoglobin, platelets, hematocrit & differential	
CEA \$30	
Monitor the response to therapy of people diagnosed with colon cancer. It may also be used as a marker for medullary thyroid cancer & cancers of the rectum, lung, breast, liver, pancreas, stomach & ovaries.	
Celiac Disease Panel \$120	
Celiac disease tests are primarily used to help diagnose and monitor celiac disease. They are usually ordered on people with symptoms suggesting celiac disease, including anemia and abdominal pain. These tests can also be a measure of your immune system's response to gluten in the food you eat indicating a gluten sensitivity.	
CKMB \$20	
To distinguish between skeletal muscle and heart muscle damage; sometimes to determine if you have had a heart attack; sometimes to detect a second or subsequent heart attack or to monitor for additional heart damage	
Cortisol \$30	
Cortisol has many functions. It helps the body use sugar (glucose) and fat for energy (metabolism), and it helps the body manage stress. Cortisol levels can be affected by many conditions, such as physical or emotional stress, strenuous activity, infection or injury.	

Cotinine \$75	
Detects the presence of and/or measures the quantity of nicotine or its metabolite cotinine in the body. Used to determine whether someone uses products containing tobacco or nicotine.	
Creatine Kinase (CK) \$20	
Used to detect inflammation of muscles (myositis) or serious muscle damage and/or the evaluation of chest pain or other symptoms that lead a doctor to suspect heart damage	
Direct Bilirubin \$10	
Used to evaluate liver dysfunction	
Drugs of Abuse (DOA7) \$75	
Marijuana, cocaine, methadone, amphetamines, opiates, benzodiazapines, barbiturates, Ecstasy, PCP Estradiol \$40	
Used to treat menopause	
Estrogen \$30	
Evaluation of menopause, fertility, and gynecological conditions	
Ferritin \$25	
Evaluation of iron deficiency anemia	
Flu A/B Screen \$20	
Influenza will be reported per Virginia Department of Health state guidelines	
Follicle Stimulating Hormone (FSH) \$30	
Evaluation of menopause, fertility, and gynecological conditions	
Free T3 \$30	
Evaluation of thyroid disorders	
Free T4 \$20	
Evaluation of thyroid disorders	
GI Panel \$550	
Rapid method of determining whether you have an infection of your digestive tract due to disease-causing (pathogenic) bacteria, parasites or viruses causing diarrhea	
Glucose \$10	
Sugar level	
Hemoglobin A1C \$20	
Glycosylated hemoglobin	
Hepatic (Liver) Function Panel \$25	
Used to evaluate liver dysfunction. (Albumin, Total Bilirubin, Direct Bilirubin, Alkaline Phosphatase (ALP), Alanine Aminotransferase (ALT), Aspartate Aminotransferase (AST) and Total Protein) Hepatitis B	
Surface Antibody \$40	
Test for immunity to Hepatitis B Virus	

Hepatitis C Antibody \$40	
Exposure to Hepatitis C viral infection, will be reported per Virginia Department of Health state guidelines	
Hepatitis Panel \$100	
(Hepatitis A Antibody, Hepatitis B Core Antibody, Hepatitis B Surface Antigen, Hepatitis C Antibody). A viral hepatitis panel is used to help detect and/or diagnose acute liver infection and inflammation that is due to one of the three most common Hepatitis Viruses: Hepatitis A Virus (HAV), Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV).	
Iron & TIBC \$25	
Evaluation of anemia	
Lipase \$15	
Evaluation of Pancreatitis	
Lipid Panel \$25	
Cholesterol, Triglycerides, HDL, LDL	
Lithium \$15	
Drug level	
Luteinizing Hormone (LH) \$30	
Evaluation of menopause, fertility, and gynecological conditions	
Lyme Disease, including Reflex to Western Blot \$100	
Detects Lyme Disease with confirmation testing included, will be reported per Virginia Department of Health state guidelines	
Magnesium \$15	
Mineral magnesium level	
Measles/Mumps/Rubella Immunity \$58	
Microalbumin \$20	
Used to evaluate early signs of kidney damage in people who have a risk of kidney disease	
Mono Screen \$15	
Mononucleosis	
Pain Management Drug Screen \$125	
Phosphorus \$12	
Measures phosphorus in blood	
Pro-BNP \$50	
Used to help detect, diagnose, and evaluate the severity of heart failure	
Progesterone \$30	
Evaluation of menopause, fertility, and gynecological conditions	
Prolactin \$30	
Evaluation of menopause, fertility, and gynecological conditions	

Prothrombin Time (PT/INR) \$9	
PSA, Free and Total \$50	
Used to evaluate prostate cancer potential	
PSA - Prostate Specific Antigen \$31	
Early warning for prostate disorder	
Renal Panel \$15	
Used to diagnose and monitor kidney function RMSF Panel	
(IgG/IgM) \$60	
Detects Rocky Mountain Spotted Fever, will be reported per Virginia Department of Health state guidelines	
Sed Rate \$15	
Detects inflammation in the body	
Strep Screen \$20	
Screen only	
T3, Reverse \$25	
Evaluation of Thyroid Disorders	
T3 \$25	
Evaluation of thyroid disorders	
TB Quantiferon Gold \$80	
The QuantiFERON®-TB Gold test is an assay to aid in the diagnosis of both latent and active infection with Mycobacterium tuberculosis	
Testosterone, Free & Total \$90	
Testosterone (Total) \$45	
Thyroid Antibodies \$50	
Evaluation of thyroid disorders	
Thyroid Panel \$45	
TSH, T4 & T-uptake	
Thyroid Stimulating Hormone \$29	
TSH	
Triglycerides \$10	
Monitor for people who have identified risk factors for heart disease	
Troponin \$20	
To determine if you have had a heart attack or injury to heart muscle; to determine if your angina (chest pain related to heart trouble) is worsening	
Urinalysis \$10	
Urine Culture \$35
